

The Nano-Thermal Bioengineering Laboratory (NT-BEL) at The University of Texas at Dallas is looking for one Postdoctoral Researcher to work on the nanomaterials and their applications in brain cancer drug delivery.

Requirements:

- Experience in nanomaterial chemistry and characterization (TEM) is required;
- Experience in cell culture technique is required;
- Experience in small animal work (in particular the brain) is required;
- Experience in optics is a plus;
- Experience in blood-brain barrier is a plus;
- Teamwork spirit and strong motivation is essential.

To apply, please send a cover letter and your CV with contact information of at least 3 references to Dr. Zhenpeng Qin by email (zhenpeng.qin@utdallas.edu). In the cover letter, please briefly describe your research experience, career plan, earliest starting date, and etc. The position is open immediately, so you can start immediately.
