

**Tenured or Tenure-Track Faculty Position
Quantitative Macromolecular Therapeutics
Department of Pharmaceutics**

The Department of Pharmaceutics, College of Pharmacy, at the University of Minnesota, invites applications and nominations for the position of Assistant Professor (tenure-track) or Associate Professor (tenured) specializing in quantitative and/or modeling-based approaches to macromolecular therapeutics. Exceptional candidates in other areas of pharmacokinetics and quantitative drug delivery will also be considered.

The Department of Pharmaceutics has three areas of research emphasis: pharmacokinetics; pharmaceutical materials science and engineering; and biomaterials and drug delivery (<https://www.pharmacy.umn.edu/departments/pharmaceutics>). We are seeking candidates who will further enhance research and teaching in the department and develop synergies with current areas of departmental strength. The College of Pharmacy provides an excellent environment for professional advancement and is ranked as the second top pharmacy school in the nation, being third in research funding. The University of Minnesota, including the Academic Health Center with over 1,400 faculty members in basic and applied biomedical disciplines, is a highly integrated research environment, with close proximity of health sciences, basic sciences and engineering. Infrastructure and opportunities for collaboration are exceptional.

Requirements for this position include an earned doctorate (Ph.D. or equivalent) in pharmaceutics, biomedical or biological engineering, or similar field and preferred completion of a post-doctoral research fellowship with research expertise in quantitative macromolecular therapeutics. The successful candidate will be expected to develop a vigorous, externally-funded research program; have a commitment to professional and graduate education; and develop collaborative research programs. Faculty rank is dependent on the candidate's qualifications and experience consistent with departmental, collegiate and University policy. To be considered for an Associate Professor position, the candidate should have established a nationally recognized research program.

The University of Minnesota offers an exceptional benefits package including excellent medical, dental, disability insurance and faculty retirement programs. A competitive salary and start-up package will be offered commensurate with the candidate's experience and rank. Initial review of applications will begin upon receipt, and applications or nominations will continue to be accepted until the position is filled. Application instructions may be found at www.pharmacy.umn.edu/about/job-opportunities . For specific questions about this position, please contact the search chair, Dr. William Elmquist at elmqu011@umn.edu.

The University of Minnesota is an equal opportunity educator and employer.
